

Attention Healthcare Workers Directly Caring for COVID-19 Patients

If you provide daily direct care for COVID-19 patients, you are eligible to donate IF you can meet **all** of the following criteria:

- Attest that you are “fully vaccinated” (at least 2 weeks past either your second dose in a 2-dose vaccine series, or at least 2 weeks past receiving a single-dose vaccine).
- Attest that you have only come in contact with COVID-19 patients while using full PPE (including N95 mask) in the 14 days prior to donation.
- Meet all other prescreening criteria.

Healthcare workers who do not directly care for COVID-19 patients must meet all routine donor screening criteria.

Thank you for your understanding and helping us keep donors and our staff safe. We appreciate your interest in donating blood.

GIVE HOPE | GIVE LIFE | GIVE BLOOD
