<input type="checkbox"/> Other ** (Requires pre-approval of LifeStream Medical Director) _____	_____

Printed Physician's Name/Credentials: _____

Address: _____

Phone: _____ E-Mail: _____ Fax: _____

Physician's Consent and Request for Autologous Donations

I understand that the LifeStream Medical Director has the final responsibility for determining donor suitability.

In my opinion, the patient is physically able to withstand the withdrawal of the ordered components. I am aware that severe anemia, cardiovascular instability or any signs of bacteremia or viremia are contraindications for autologous blood collection. I have discussed autologous blood collection with my patient and in my opinion, the patient understands the nature and risks of the proposed procedure and that autologous donation is an optional alternative to using units from the community blood supply.

Authorized Signature (Ordering MD/DO, NP, PA)

Date

Requests with the practitioner's name signed by another individual and initialed or a stamped signature will be returned for an authorized signature.
